ABSTRACT

This survey is the third in a series of studies of the salaries of engineering technicians conducted by the Engineering Manpower Commission of the Engineers Joint Council. The basic format for the salary presentations is maturity curves in which salary appears as a function of years of experience. Median salaries of all engineering technicians in 1966, 1969, and 1971, as well as a distribution by level of formal education for the respondents in 1971, are included. The distribution of the sample of 759 different establishments employing 71,773 technicians is presented by area of employment. General salary curves for engineering technicians, graduate technicians (Associate degree), graduate technologists (Bachelor's degree), and nongraduate technicians are given for the entire United States and also by four geographic regions of the United States. Industry group curves are included for 20 different employment groups. Curves are presented for small, medium and large industrial establishments and for federal, state and local government as well as educational employers. (TS)

ENGINEERS JOINT COUNCIL

Engineers Joint Council (founded in 1941 and incorporated in 1958) is a federation of engineering societies whose general objective is to advance the art and science of engineering in the public interest.

In furtherance of this general objective the Council shall:

- a) Provide for regular and orderly communications among its member societies.
- b) Act as an advisory and coordinating agency for member society activities, as mutually agreed.
- c) Organize and conduct forums for the consideration of problems of expressed concern to member societies.
- d) Identify needs and opportunities for service in the engineering community and inform the concerned engineering institutions.
- e) Recommend appropriate programs of studies and research to engineering institutions and especially to member societies.
- f) Undertake, in accordance with policies mutually agreed to, specific activities or projects that the member societies acting individually could not accomplish as well.
- g) Represent the member societies when they deem such joint representation desirable.

THE ENGINEERING MANPOWER COMMISSION  
OF ENGINEERS JOINT COUNCIL

The Engineering Manpower Commission was organized in 1951 as part of Engineers Joint Council, to serve as a focus for national technological manpower problems.

The Commission's program is carried out through the collection, analysis, and publication of significant data on engineering manpower, as well as the development of programs and policies designed to acquaint the public with the importance of engineering to the national welfare.

The Engineering Manpower Commission is charged with the following responsibility:

"To engage in studies and analyses of the supply, demand, and utilization of engineering and technical manpower; to make recommendations, conduct programs, and develop reports concerning these aspects of engineering and technical manpower; and to carry on such other programs in the field of manpower as may be authorized by the Board of Directors of EJC."

EMC OFFICERS AND STAFF

William Hazell . . . . . Chairman

Walter M. Carleton . . . . . Vice-Chairman

Richard C. Fremon . . . . . Chairman  
Surveys Committee

John D. Alden . . . . . Executive Secretary

### ACKNOWLEDGMENTS

This study was conducted under the direction of John D. Alden. Most of the detailed work of conducting the survey and screening the returns was done by Carol Iceland. The text of this report was typed by Gail Goldberg.

The computer program used for developing the salary curves was originally written by Richard C. Fremon of Bell Telephone Laboratories, who is chairman of the EMC Surveys Committee. Mr. Fremon also contributed general guidance and consultation at all stages of the survey.

We are particularly grateful to the many salary administrators who provided the source data on which these curves are based. Space does not permit their individual identification, but without their cooperation we would be unable to conduct our biennial salary surveys.

### NOTE TO EMPLOYERS AND SALARY ADMINISTRATORS

The Engineering Manpower Commission is always interested in improving its survey coverage. If your company would like to participate in future surveys, please write to Miss Carol Iceland, Engineering Manpower Commission, 345 East 47th Street, New York, New York, 10017 and ask to be put on our surveys list. We also welcome your comments and suggestions for improving our survey and salary reports.

John D. Alden  
Executive Secretary  
Engineering Manpower Commission

## SALARIES OF ENGINEERING TECHNICIANS

### INTRODUCTION

This survey is the third in a series of studies of the salaries of engineering technicians. The first survey was conducted on an experimental basis in 1966 as a result of widespread interest in the way engineering technicians were being utilized in industry and other areas of employment. Because the Engineering Manpower Commission had previously established a pattern of surveying engineers' salaries biennially on the even-numbered years, it was decided to conduct the technicians' salary survey regularly in the intervening years. This necessitated a three-year interval between the 1966 and 1969 surveys. From now on, however, technicians' salaries will be studied every two years.

The basic format for our salary presentations is maturity curves in which salary appears as a function of years of experience. In the case of college graduate technicians, experience is measured as years since graduation with either the two-year associate degree or the four-year bachelor of technology degree, as appropriate. Non-graduates, of course, have to be reported on a different basis, as we have found that age is the only practical variable for which data are readily available. Ideally, years of working experience would be preferable, but employers have indicated their inability to report years of experience obtained by their technicians in previous jobs, or to determine accurately whether prior experience should or should not be counted toward employment as a technician. In order to compare experience as measured by age with that measured by years since graduation, we have assumed age 20 as equivalent to graduation from a two-year associate degree curriculum, and 22 as the equivalent age for bachelors' degree graduates.

The Engineering Manpower Commission is not attempting to establish salary standards for any industry or employee group. The curves presented in this report simply show what various sectors of employment were paying as of August 1971 when the survey was taken. Users are cautioned to read carefully the paragraph on limitations inherent in this kind of salary data. When used with judgment under conditions where the data can reasonably be expected to apply, these curves should be of definite value to personnel managers, educators, and individual engineering technicians alike. We present this report as a service to these people and to the engineering community at large.

### HIGHLIGHTS OF THE SURVEY

Engineering technicians as a group have received average salary increases ranging between 2 and 11 percent in the two years since our 1969

survey was conducted. Figure 1 shows how median curves have risen since our initial survey in 1966. The relatively small increases since 1969 are a reflection of the economic recession, aerospace and defense cut-backs, and other conditions that caused a decrease in the demand for engineers and technicians in 1970 and 1971. Starting salaries for new graduates were noticeably affected, and this effect is indicated in the very small difference between the 1969 and 1971 curves within a few years after graduation. Salaries for more experienced technicians generally increased by about \$1,000 in the two-year interval between the most recent surveys, without much regard for age or length of experience. It is impossible to predict trends for future years on the basis of the limited series of data available to date. In addition to external factors such as the economic situation, survey coverage varies from year to year and improvements are made in our survey methodology. The curves of Figure 1 provide a rough general guide only.

The 1971 survey results show that graduate technicians start out at substantially higher salaries than non-graduates, but the difference becomes less and less with increasing experience. The median annual salary for graduate technicians in August 1971 started at \$7,450 with less than a year of experience, increased steadily to \$10,500 ten years after graduation, then rose gradually to a maximum of \$11,600. Non-graduate technician median salaries in 1971 started at \$6,150 and rose to a peak of \$10,000 after 25 years of experience.

Four-year bachelors' degree technologists are reported as a separate category in this survey. Median starting salaries for this group began at \$9,450, 27 percent higher than the median for two-year graduates and 54 percent more than for non-graduates. Fifteen years after graduation, however, the median for the bachelors' degree holders was about the same as that for two-year graduates with the same length of experience. Too much significance should not be read into this finding, however, because the modern bachelor of technology program is still relatively new. Many of the salaries reported for older technicians with bachelor's degrees probably applied to people doing technician work who happened to have a degree in some field other than engineering. The EMC surveys to date indicate that the differential enjoyed by the new bachelor's degree technicians will continue to persist as this group becomes more numerous and its members grow in experience.

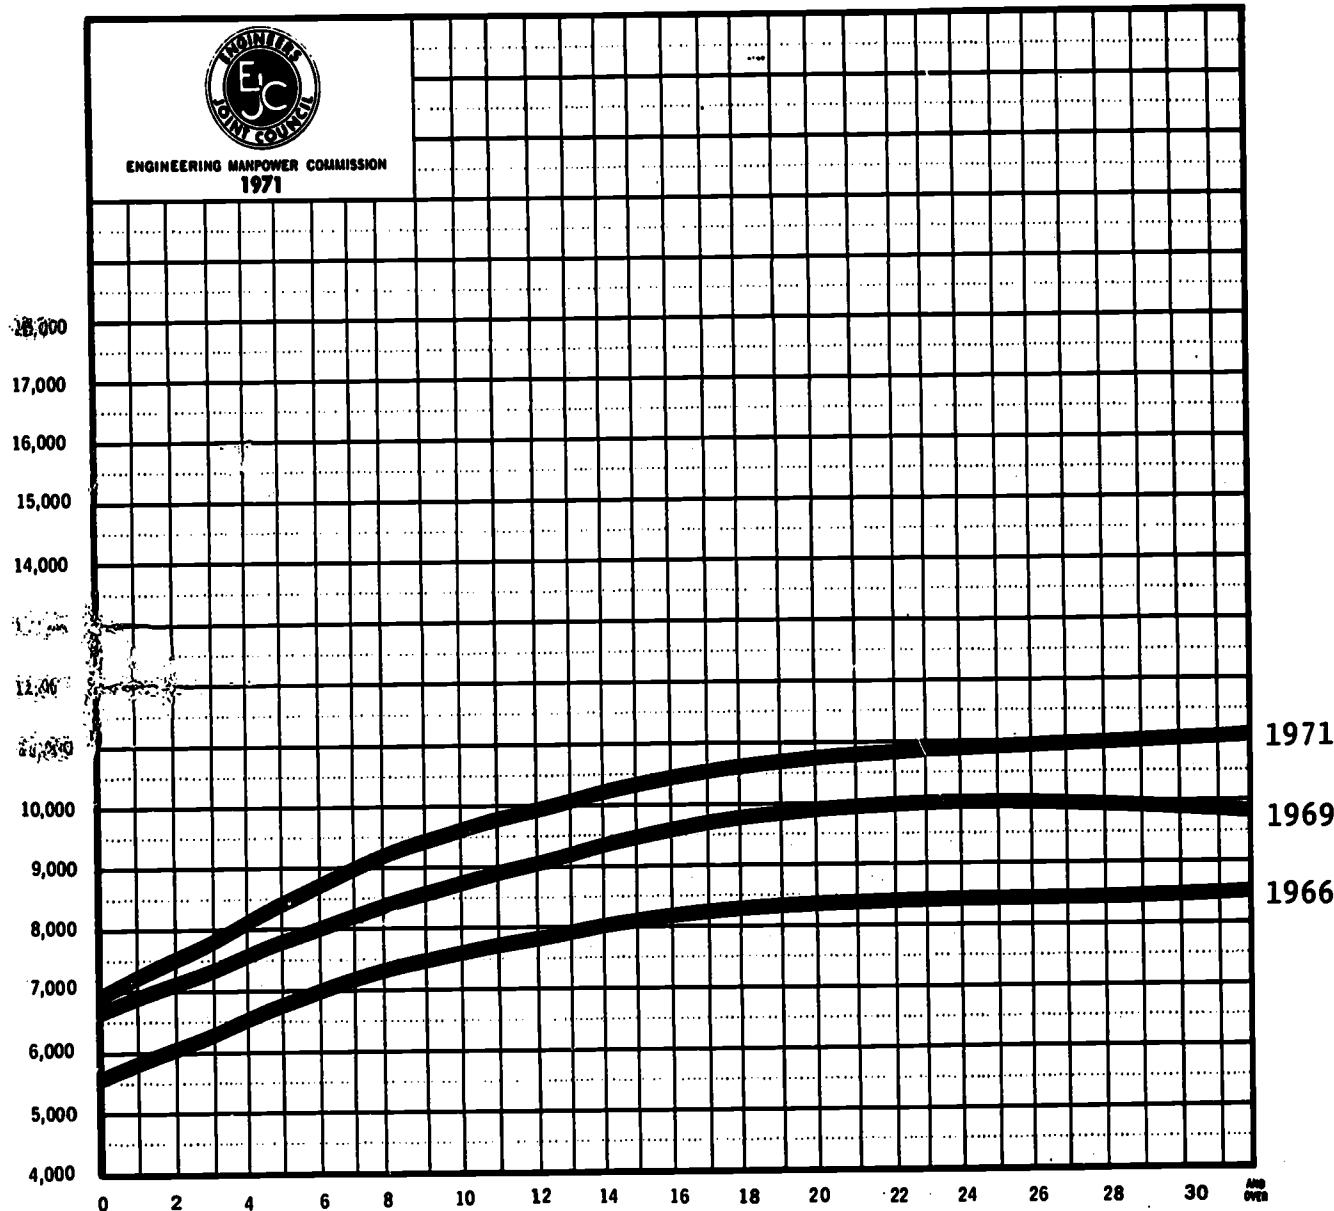

Figure 2 shows the median salary curves for the three categories of technicians plotted on a single graph. These may be compared with the detailed smooth curves found in the body of the report.

A new feature of this report is the salary chart for a weighted national average of all technicians. In order to give each industry group its proper weight in relation to total national employment of technicians, factors were introduced into the computer program to compensate for over-representation of survey replies in some groups compared to others. This provides a more representative set of data than would be obtained by simply summing

FIGURE 1

Median Salaries of Engineering Technicians  
1966-1971

Annual Salary by Equivalent  
Years Since Graduation  
from Technical Institute\*

Note: 1966 curve is based on raw data and applies to technicians in industry only. See page 10 for explanation of curve smoothing routine used for computing salary data in 1969 and 1971. Comparisons between curves are approximate only. Data for the 1966 report were collected in December 1965 and January 1966. Data for the 1969 report were collected in October and November 1969. Data for 1971 were collected in July and August of that year.

all survey responses. As a matter of interest, this survey covers such a large population of technicians that there was practically no difference between the weighted national average curves and those for all respondents. Therefore the latter curves have not been published in this report.

#### HOW THE SURVEY WAS CONDUCTED

A three-part questionnaire form was used (see facsimile on page 76) on which respondents simply indicated the number of individuals in appropriate boxes of the salary versus experience matrix. No special definitions were given other than those printed on the questionnaire. Forms were sent to EMC's regular list of survey participants, consisting of employers in all major areas of industry, government, and higher education.

Returns were reviewed for accuracy and consistency, and coded according to industry group and geographical location. Then the salary data were keypunched and verified. The punched cards were processed through our special three-stage computer program. The output of the first stage, consisting of reconstructed summary reports for each respondent, was reviewed to detect and correct any gross keypunch errors. The second stage output consisted of distribution matrices for each selected industry group. More groups were actually analyzed than are included in this report, in order to arrive at the best and most useful combinations. Finally data tables were produced for each selected group. These tables have been reproduced directly below the plotted salary curves in this report.

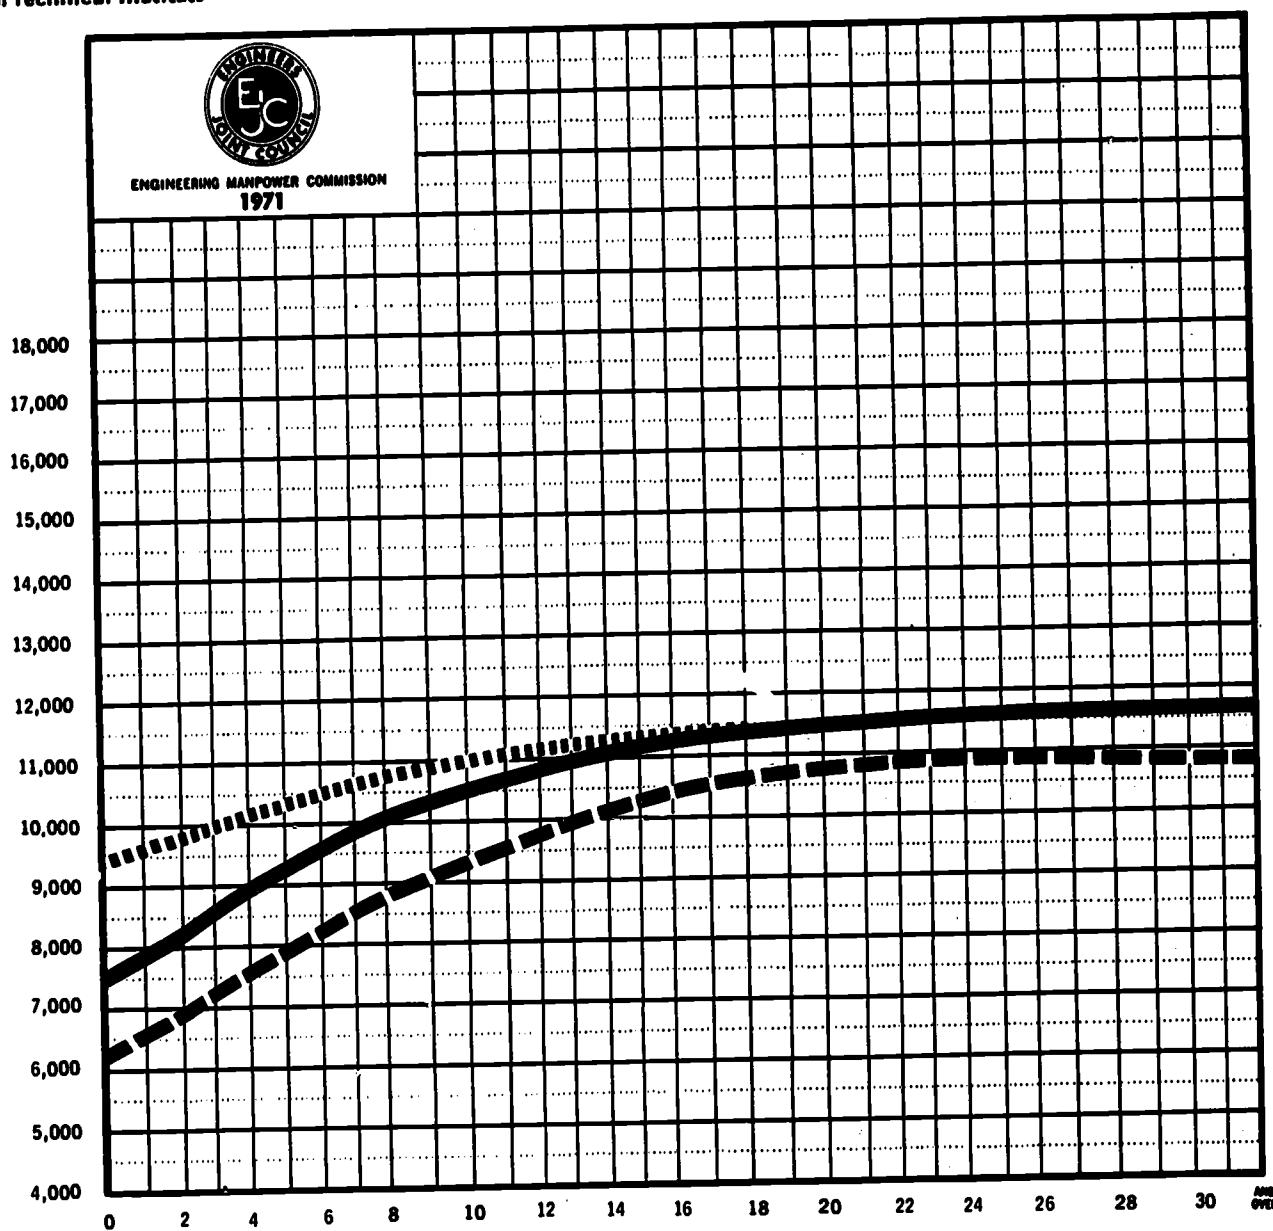

The EMC computer program calculates salary medians, quartiles, deciles, and means for each array of salaries in a given "Years Since Graduation" column. Since salaries are reported within brackets of \$500 or \$1000, the computer interpolates each fractile to the nearest \$50 by assuming a straight-line distribution between the extremes of the salary bracket. For example, if the median technician happened to be the 20th one in the \$9,500 to \$10,000 bracket, and there were 50 salaries reported in this bracket, the median point would be 20/50 of the range covered or \$200, and the computed median salary would be \$9,700.

The fractiles are first produced as "raw" data. In general we have found that curves plotted on the basis of raw data contain many irregularities that result more from inherent limitations of the methodology than from significant changes in compensation practices. Therefore most of the curves presented in this report are based on "smooth" data developed by a curve-fitting routine. Each fractile curve is computed separately in the form  $y = ax^2 + bx + c$ , where  $y$  represents salary and  $x$  represents years of experience raised to a power  $z$ . The smoothing program determines the values of  $a$ ,  $b$ ,  $c$ , and  $z$  that give the minimum sum of the squares of the differences between the raw and smooth values of  $y$ , the squared differences being weighted by the populations associated with each of the data points.

Although raw data and distribution matrices have not been published in this report, they may be obtained from EMC for any of the charts on special order at \$1.00 per table, if desired.

#### METHOD OF PRESENTATION

Each set of curves is defined according to the industry group, degree level, or geographical region covered. Respondents constituting each industry group are listed starting on page 72. This enables users to determine whether their own organization is reasonably comparable with the group covered by the curves. Geographical regions are defined on page 21.

Below each set of curves are printed the data points on which they are based. The data tables also include mean salaries (which are not plotted and normally differ little from the median) and the number of salaries within each column. Users should always note these figures to be sure that the age distribution of their own employees is consistent with the group described by the curves. Data points have been omitted where there were fewer than five salaries in a column. The data tables also list the number of salaries above \$16,000 or below \$4,000, which were the limits established by the physical size of the questionnaire form.

In surveys of this kind there is always a chance that one or two large employers may dominate a particular industry group. To avoid such over-representation we weight groups where necessary to insure that no employer is responsible for more than half of the data. Such groups are indicated below the data tables and the actual number of salaries reported by respondents in the group is given in addition to the weighted total.

To protect the data provided by individual respondents, we require that there be at least five employers in an industry group before salary curves are published. The confidentiality of individual salary schedules is protected at all times.

#### COVERAGE AND RESPONSE

This report is based on returns submitted by 759 different establishments employing 71,773 technicians. A tabulation by category appears on page 15.

#### NOTES ON THE SALARY CURVES

Explanatory notes appear below for those groups whose identity is not obvious from the headings on the charts and tables. (See list starting on page 72 for employers included in the various categories.) The division or location is specified where data were not submitted for the entire company.

In some cases the detailed curves may appear to show graduate technicians receiving lower salaries than nongraduates for a given number of

years of experience. In part this may be due to the operation of our curve-smoothing computer program, but it may result from other factors as well. College programs in engineering technology are relatively new, and until recent years have produced only small numbers of graduates. Many older technicians may have obtained their formal educations at an older age than current graduates, while others will of course have obtained most of their training on the job. All curves show that recent technical school graduates are making significantly higher salaries than nongraduates, but after 20 or more years of experience it would not be surprising for the educational differential to become less significant in comparison with on-the-job training and experience.

Because of the difficulty in integrating bachelors' degree holders with other technicians, this group has been excluded from all curves except those on page 18. Since the number of bachelor's degree technicians in any employment group is very small, the effect of adding them to the other curves would probably be negligible. To be more exact, however, the heading "All Technicians" where used in this report should properly be interpreted as "Technicians with an associate degree and nongraduates."

**REGIONAL CURVES** - The eight sets of curves on pages 22 to 29 show how technician salaries break down by major geographical region. Because employment patterns differ greatly from state to state depending on concentrations of industry or government agencies, these curves should be interpreted only as rough guides to overall regional variations.

**ALL MANUFACTURING INDUSTRIES** - These curves are composites of the following industry groups -- Aerospace, Chemicals, Electrical Equipment, Electronic Equipment, Instruments, Machinery, Metal Products, Other Manufacturing, Petroleum, and Shipbuilding.

**CHEMICAL AND PETROLEUM INDUSTRIES** - This group consists of the combined Chemical and Petroleum companies in the list of participants. Curves for the Chemicals and Petroleum groups have also been broken out separately for all technicians, but the data were insufficient to provide graduate versus nongraduate comparisons for these subgroups. The separate set of curves for the Petroleum Industry includes the oil companies plus a few others indicated by (P) on the list of participants.

**ELECTRICAL EQUIPMENT** - These curves have been weighted to insure that no single employer provided as much as half of the data.

**ELECTRONIC EQUIPMENT** - These curves have been weighted to insure that no single employer provided as much as half of the data.

**MECHANICAL PRODUCT INDUSTRIES** - This group consists of the Aerospace, Instruments, Machinery, and Shipbuilding groups. Shipbuilding is not reported separately because there were too few participants. Separate curves are included for all technicians in the Aerospace, Instruments, and Machinery Industries but the data were insufficient to provide graduate versus nongraduate curves for these groups.

**AEROSPACE** - This group includes the aerospace manufacturing companies in the list of participants plus companies in other fields (such as airborne electronics, air transportation, etc.) identified by (A) in the list of participants. The aerospace curves have been weighted to insure that no single employer provided as much as half of the data.

**ALL NONMANUFACTURING INDUSTRIES** - This group includes companies listed under Communications, Construction and Mining, Electric Utilities, Engineering and Consulting, Research, Transportation, and Gas Utilities.

**NONGOVERNMENT RESEARCH AND DEVELOPMENT** - The curves on pages 56 and 57 are for employers listed under Research plus selected research components of various industry groups as identified by (R) in the list of respondents. Separate curves have been provided for government research establishments on page 66.

**COMMUNICATIONS, GAS UTILITIES AND TRANSPORTATION** - These groups did not include sufficient data to break out graduate versus nongraduate curves, but curves for all technicians are given.

**CURVES BY SIZE OF INDUSTRIAL ESTABLISHMENTS** - These include only manufacturing and nonmanufacturing industry respondents to the survey. Small establishments are arbitrarily defined as those reporting fewer than 1000 employees, medium establishments as those between 1000 and 5000, and large establishments as those with 5000 or more total employees.

#### **LIMITATIONS**

Users of this report should apply salary curves with judgment. We report salary data as furnished by the survey respondents, but there is no way of knowing whether respondents represent a typical cross-section of a particular industry group. Data in some year columns may be based on a relatively small number of salaries. In such cases the smoothed curves may represent a considerable departure from the raw data points. As explained previously, the methodology and presentation of data involve a number of inherent limitations. The salary curves and data must thus be viewed as general guides, not as absolutes.

In publishing these curves EMC is attempting to show what prevailing salary patterns are, not what we think they ought to be. In the final analysis the salary paid to any individual is determined by many factors, especially his performance of his assigned duties. Such factors cannot be measured by a survey of this kind. Therefore EMC cannot undertake to evaluate individual salary situations, nor to advise employers as to the salaries they should pay for specific positions.

Distribution of Sample by Area of Employment

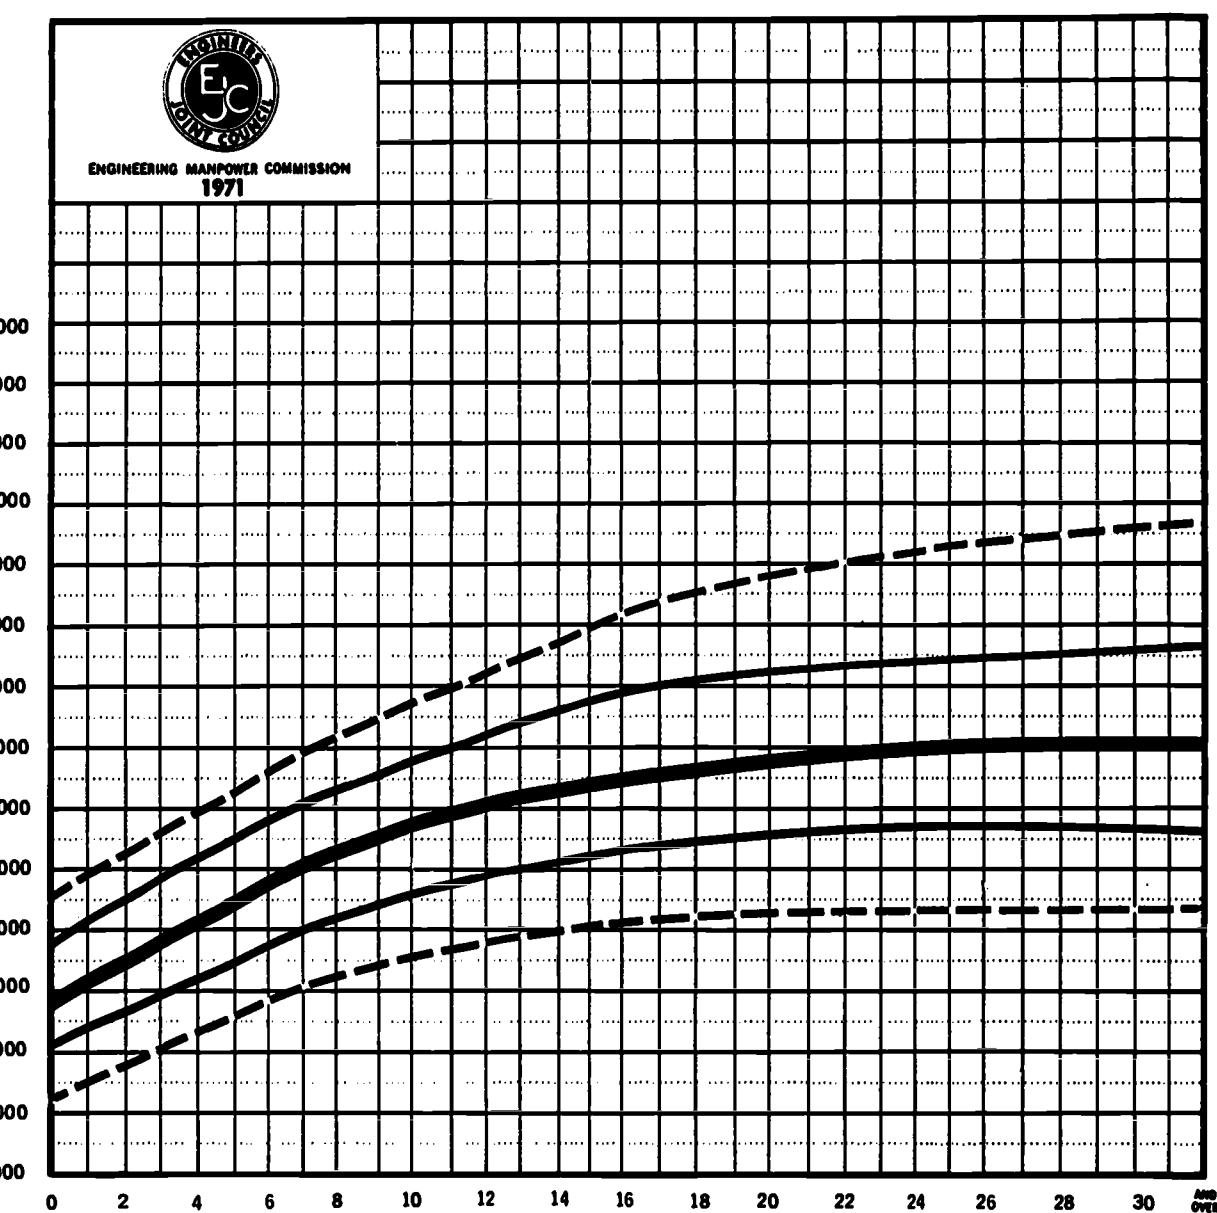

<u>Employment Area</u>		<u>Number of Employers</u>	<u>Number of Technicians</u>
Manufacturing Industries		293	26,923
Aerospace		22*	4,144
Chemicals		27	876
Electrical Equipment		24	7,713
Electronic Equipment		41	8,264
Instruments		17	586
Machinery		56	1,683
Metal Products		58	1,193
Other Manufacturing		37	758
Petroleum		25*	1,018
Shipbuilding (Note 1)		3	1,544
Nonmanufacturing Industries		270	15,481
Communications		8	345
Construction and Mining		37	1,292
Electric Utilities		71	5,801
Engineering and Consulting		118	4,396
Gas Utilities		12	366
Research (Nongovernment)		32*	5,653
Transportation		8	235
Government		102	26,999
Federal		30	6,880
State		24	18,912
Local		48	1,207
Educational Institutions		94	1,112
Bachelor's Degree Technologists		---	1,258
All Employers		759	71,773

\* Asterisked categories include the following employers that were also counted in another category: Aerospace, 11; Petroleum, 6; Research, 16. However, respondents have been counted only once in the totals for Manufacturing Industries, Nonmanufacturing Industries, and All Employers. The 1,258 Bachelor's Degree Technologists are included in the total but not in the individual areas of employment.

Note 1: Separate curves for Shipbuilding have not been published because of the small number of employers responding. Technicians in this group are included in the larger categories headed Mechanical Product Industries, All Manufacturing Industries, and the other summary tables.

\*Base year (0 years since graduation) is 1971. For Associate degrees and non-graduates this is considered equivalent to age 20. For Bachelor's degree the equivalent age is 22.

## LIST OF PARTICIPANTS IN THE 1971 TECHNICIANS SALARY SURVEY

### AEROSPACE

- (R) The Aerospace Corporation
  - Avco Aerostructures Division
  - Avco Lycoming Division
  - Bell Aerospace Company
  - The Boeing Company
  - The Boeing Company, Vertol Division
  - Walter Kidde and Company, Inc.
  - Simmond Precision, GLA Division
  - Telodyne CAE
  - Thiokol Chemical Corp., Huntsville Division
  - Vought Missiles and Space Company, Texas Division

### CHEMICALS

- (R) Air Reduction Company, Inc.
  - American Enka Company
  - The Ansul Company
  - Atlantic Richfield Hanford Company
  - Bacon Industries, Inc.
  - Cabot Corporation
- (P) Cosden Oil & Chemical Company
  - E. I. du Pont de Nemours & Company
  - The Ensign-Bickford Company
- (R) Ethyl Corporation
  - First Mississippi Corporation
  - B. F. Goodrich Chemical Company
  - Hercules Incorporated
- (R) Ionics, Incorporated
  - Jefferson Chemical Company, Inc.
  - S. C. Johnson & Son, Inc.
  - Eli Lilly & Company
  - Mississippi Chemical Corporation
  - Norden Laboratories, Inc.
  - Nowell Corporation
  - PPG Industries, Inc.
  - Quaker Chemical Corporation
  - Salsbury Laboratories
  - Sika Chemical Corporation
  - Terra Chemicals Int. Inc.
  - The Upjohn Company
- (R) United States Gypsum Research Center

### ELECTRICAL EQUIPMENT

- Acme Electric Corporation
- Aero-Flow Dynamics, the Wing Company
- AMP Incorporated
- Babcock & Wilcox, Bailey Meter Company
- (A) Bendix Electrodynamics Division
  - Bodine Electric Company
  - Colt Industries, Central Moloney Transformer Div.
  - Electric Machinery Manufacturing Company
  - Electric Motors and Specialties, Inc.
  - Emerson Electric Company
  - General Cable Corporation
  - Heinemann Electric Company
  - ITT Blackburn Company
  - Kearney Company
  - Littelfuse Inc.
  - Litton Industries, Jefferson Electric Company
  - P. R. Mallory and Company, Inc.
  - McGrav-Edison, National Electric Coil Division
  - Ranco Controls Division
  - Spencer Turbine Company
  - Sunbeam Appliance Company
- (A) Vapor Corporation
  - Western Electric Company, Inc.
  - Westinghouse Air Brake Co., Signal & Communications Div.

### ELECTRONIC EQUIPMENT

- (A) Aircraft Radio Corp., Cessna Aircraft Co.
- Airpac Electronics, Inc.
- American District Telegraph Company, Inc.
- American Electronic Labs, Inc.
- American Sign and Indicator
- Applied Technology
- (R) Bell Telephone Laboratories, Inc.
- (A) Bendix Avionics Division
- Bendix Communications Division
- Bendix Kansas City Division
- Collins Radio Company
- Cubic Corporation
- Dale Electronics, Inc.
- Dynasciences Corp., Instrument Systems Division
- (A) Fairchild Industries, Space & Electronics Division
- Gates Radio
- General Instrument Corporation, Electronic Systems Div.
- General Radio Company
- Globe-Union Inc.
- The Hallicrafters Company
- (A) Hazeltine Corporation
- Hewlett-Packard Company, Loveland, Col.
- Hewlett-Packard Company, New Jersey Division
- Honeywell, Inc., Massachusetts Operations
- Industrial Electronic Engineers, Inc.
- Infrared Industries, Inc.
- International Business Machines Corporation
- Jensen Manufacturing Company
- E. F. Johnson Company
- Ledex, Inc.
- Magnaflux Corporation

### Melpar

- PRD Electronics, Inc.
- Radiation Incorporated
- Realtronics
- Rogers Corporation
- Sanders Associates, Inc.
- Sola Basic Industries, GV Controls Division
- Solidstate Controls, Inc.
- University Computing Company
- Ventron Instruments Corp., Cahn Division

### INSTRUMENTS

- Becton, Dickinson and Company
- Bendix Automation & Measurement Division
- (A) Bendix Instruments & Life Support Division
- Bourns, Inc., CAI Division
- Halikainen Instruments
- Itek Corporation, Univis, Inc.
- Leeds and Northrup Company
- Mast Development Company
- Neptune Meter Company, Revere Electronic Div.
- The Ohmart Corporation
- The Perkin-Elmer Corporation
- Powers Regulator Company
- Robertshaw Controls Company, A & I Division
- Stewart-Warner Corporation, Alemite & Instrument Div.
- Sybron Corp., Taylor Instrument Process Control Div.
- Trans-Sonic, Inc.
- Zimmer Manufacturing Co.

### MACHINERY

- Aber Corporation, Denison Division
- Ace Industries, Inc., AMCAR Division
- Ajax Iron Works
- Antale Company
- Artisan Industries, Inc.
- Aero New Idea Farm Equipment Company
- (R) Babcock & Wilcox Company, Research and Development Div.
- Barber-Colman Company
- Jendix Industrial Tools Division
- Borg Warner, York Division
- (R) Bowles Fluidics Corporation
- Bryant Grinder Corporation
- (R) The Budd Company, Philadelphia
- Buffalo Forge Company
- Cherry-Burrell Corporation
- Clyde Iron Works, Inc.
- Colt Industries, Fairbanks Morse Power Systems Div.
- Cummins Engine Company, Inc.
- Deere and Company
- The Deister Concentrator Company, Inc.
- Denpatch Industries, Inc.
- The DeVilbiss Company
- Donaldson Company, Inc.
- Dresser Industries, Inc., Dresser Clark Division
- Dresser Industries, Inc., Machinery Group
- Dyno Industries, Inc.
- The Electric Furnace Company
- General Signal Corp., Aurora Pump
- (R) Harris-Intertype Corporation, Printing Equipment Research Center
- Heltzel Company
- Hyster Company
- Kearney and Trecker Corp.
- Layne and Bowler Pump Company
- Lear Siegler, Inc., HYPRO Division
- (A) Lear Siegler, Inc., Power Equipment Division
- Lilliston Corporation
- Long-Airdox Company
- Mereen-Johnson Machinery Company
- Minneapolis-Moline
- Moog, Inc.
- Nutting Truck and Caster Company
- The Olgear Company
- Otis Engineering Corporation
- Page Engineering Company
- Rex Chainbelt, Inc., Mathews Conveyor Division
- Sandvik Conveyor, Inc.
- SKF Industries, Inc.
- Sperry Rand Corp., New Holland Division
- (A) Sundstrand Corporation
- Tel-E-Lect Inc.
- Trane Company, Murray Division
- Turbo Machine Company
- Twin Disc, Inc.
- The Vendo Company
- Weber Marking Systems, Inc.
- Barry Wehmiller Company

### METAL PRODUCTS

- ACF Industries, Inc., W-K-M Valve Division
- Airtherm Manufacturing
- Allied Structural Steel Company
- (R) American Can Company, Research & Development & Technical Service
- American Chain & Cable Co., Inc., Chain Division
- AMF Beaird, Inc.
- Auto Specialties Manufacturing Company
- Avco Lycoming, Charleston Plant
- Avco Precision Products Division
- Bradley Washfountain Company
- Butler Manufacturing Company
- Camcar Screw Manufacturing

Camden Wire Company, Inc.  
 Chamberlain Manufacturing Corporation  
 Colt Firearms  
 Crunden Martin Manufacturing Company  
 Douglas United Nuclear, Inc.  
 Ellisco, Inc.  
 FMC Corporation, Northern Ordnance Division  
 Fram Corporation  
 Graham Manufacturing Company, Inc.  
 Gulf and Western Industries, Inc., Amron Division  
 Hamill Manufacturing Company  
 Harper-Wyman Company  
 Hooganen Corporation  
 The Hoover Company  
 Harvey Hubbell, Inc., Kellens Division  
 Ideal Corporation  
 Inland Steel Company  
 Intercraft Industries Corporation  
 Kelley Company, Inc.  
 Kelacy Hayes Company, Romulus, N.Y.  
 Kelsey Hayes Company, French & Hecht Division  
 King-Seely Thermos Company  
 Laclede Steel Company  
 La Crosse Cooler Company  
 Lakeside Bridge and Steel Company  
 Lamson and Sessions Corporation  
 Leckey Company  
 Litton Power Transmission Division  
 The Maytag Company  
 Midland-Ross Corp., National Castings Division  
 Modine Manufacturing Company, A & I Division  
 (R) Olin Corporation, New Haven  
 Peterson Manufacturing Company  
 Pittsburgh Canfield Corporation  
 Pittsburgh-Den Moines Steel Company  
 Reed Rolled Thread Die Company  
 St. Charles Manufacturing Company  
 Scialy Brothers, Inc.  
 Stanray Products  
 Thompson Pipe & Steel Company  
 The Timken Company  
 The Vendo Company  
 Warner Electric Brake & Clutch Company  
 Wheeling Stamping Company  
 William M. Wilson's Sons, Inc.  
 Worcester Valve Company, Inc.

## OTHER MANUFACTURING

Acushnet Company, Rubber Division  
 Acerace-Esna Elastimold Division  
 ASG Industries, Inc.  
 Bartlett-Collins  
 Bergstrom Paper Company  
 The Carborundum Company  
 Central Soya Company, Inc.  
 Clearfield Cheese Company, Inc.  
 Collins & Aikman Corporation  
 Columbian Rope Company  
 Consolidated Papers, Inc.  
 Corning Glass Works  
 Dexter Corporation, Hysol Division  
 Diamond International Corp., Penobscot Co.  
 Durkee-Atwood Company  
 Eastern Incorporated  
 Falstaff Brewing Corporation  
 Georgia Pacific Corporation, Crossett, Ark.  
 Georgia-Pacific Corporation, Woodland Division  
 Great Northern Paper Company  
 Great Plains Container Company  
 Gulf States Paper Corp., Paper Products Division  
 Hammermill Paper Company  
 Ingram-Richardson, Inc.  
 Irvin Industries, Inc.  
 Lenox China, Inc.  
 The Mead Corporation  
 The Quaker Oats Company, Fisher-Price Toys  
 Riegel Paper Corporation, New Jersey  
 Riegel Paper Corporation, North Carolina  
 Ritter Company  
 RJR Foods, Inc.  
 UARCO Incorporated  
 Utex Industries, Inc.  
 US Plywood-Champion Papers, Inc., US Plywood Division  
 Waterbury Companies, Inc.  
 Wells Lamont Corporation

## PETROLEUM

Amerada Hess Corporation  
 Atlantic Richfield Company  
 Cities Service Oil Company, Louisiana  
 Cities Service Oil Company, Oklahoma  
 Continental Oil Company, Houston  
 Continental Oil Company, Wrenshall Refinery  
 Equity Oil Company  
 Kerr-McGee Corporation  
 King Resources Company  
 Mobil Pipe Line Company  
 Pennzoil Producing Company  
 Plastation Pipe Line Company  
 Portland Pipe Line Corporation  
 Skelly Oil Company  
 The Standard Oil Company, Ohio  
 Sun Oil Company  
 Superior Oil Company  
 Tenneco, Inc.  
 United Oil Company

## SHIPBUILDING

General Dynamics Corp., Electric Boat Div.  
 National Steel and Shipbuilding Company  
 Newport News Shipbuilding & Dry Dock Company

## COMMUNICATIONS

American District Telegraph Company, Inc.  
 Carolina Telephone and Telegraph Company  
 Commonwealth Telephone Company  
 General Telephone Company of Indiana, Inc.  
 General Telephone Company of Kentucky  
 General Telephone Company of the Northwest, Inc.  
 General Telephone Company of Ohio  
 ITT Defense Communications Division

## CONSTRUCTION AND MINING

American Gislonite Company  
 Ameron Pipe Products Group, Southwest Division  
 Bankhead Mining Company, Inc.  
 Bayer and Mingolla Industries, Inc.  
 The Bunker Hill Company  
 Burke Concrete Accessories, Inc.  
 Bushman Construction Company  
 Chemical Construction Corporation  
 Clermont Engineering Company  
 The Cleveland-Cliffs Iron Company  
 Climax Molybdenum Company  
 Consolidation Coal Company  
 (R) The Construction Specifications Institute  
 Cox Brothers Construction Company, Inc.  
 Dickerson, Inc.  
 Dravo Corporation  
 Dresser Engineering Company  
 Martin K. Ely Construction Company, Inc.  
 Hecla Mining Company  
 Interpace Corporation, The Carev Salt Co.  
 (R) Johns-Manville Products Corporation, R & E Center  
 Al Johnson Construction Company  
 Kennecott Copper Corporation, Utah Copper Division  
 New Idria Mining and Chemical Company, Idria Division  
 Panacon Corporation  
 Pima Mining Company  
 Portland Cement Association  
 Prestressed Concrete Products Company, Inc.  
 The John G. Rubin Construction Company  
 The Rust Engineering Company  
 Swindell-Dressler Company  
 United Engineering and Constructors, Inc.  
 United States Borax and Chemical Corporation  
 Vulcan Materials Company, Midwest Division  
 Western Talc Company, Inc.  
 Weston and Brooker Company  
 White Pine Copper Company

## ELECTRIC UTILITIES

Alabama Power Company  
 American Electric Power Service Corporation  
 Anoka Electric Cooperative  
 Appalachian Power Company  
 Arizona Public Service Company  
 Baldwin County Electric Membership Corporation  
 Boston Edison Company  
 Carolina Power and Light Company  
 Central Hudson Gas and Electric Corporation  
 Central Illinois Public Service Company  
 Central Lincoln People's Utility District  
 Central Maine Power Company  
 Central Nebraska Public Power and Irrigation District  
 Central Power and Light Company, Corpus Christi  
 Clay Electric Cooperative, Inc.  
 Cleveland Electric Illuminating Company  
 Commonwealth Edison Company  
 Dairyland Power Cooperative  
 Delmarva Power and Light Company of Maryland & Associated Companies  
 Delmarva Power and Light Company, Northern Division  
 The Detroit Edison Company  
 Duke Power Company  
 Duquesne Light Company  
 Electric Power Board of Chattanooga  
 Eugene Water and Electric Board  
 Florida Power and Light Company  
 Georgia Power Company  
 Golden Valley Electric Association  
 Green Mountain Power Corporation  
 Gulf Power Company  
 Hartford Electric Light Company  
 Houston Lighting and Power Company, Engineering Department  
 Iowa-Illinois Gas and Electric Company  
 Jersey Central - New Jersey Power and Light Company  
 Kansas City Power and Light Company  
 Long Island Lighting Company  
 Maine Public Service Company  
 Minnesota Power and Light Company  
 Mioskota Power Cooperative, Inc.  
 Mississippi Power Company  
 Mississippi Power and Light Company  
 Missouri Utilities Company  
 Nantahala Power and Light Company  
 New England Electric System  
 New England Gas and Electric System  
 New York State Electric and Gas Corporation  
 Northeast Utilities Service Company  
 Ohio Edison Company  
 Omaha Public Power District

Orange and Rockland Utilities, Inc.  
 Otter Tail Power Company  
 Pacific Power and Light Company  
 The Potomac Edison Company  
 Potomac Electric Power Company  
 Public Service Company of Colorado  
 Public Service Electric and Gas Company, Newark, New Jersey  
 Public Utility District No. 2 of Grant County, Washington  
 Rochester Gas and Electric Corporation  
 Sacramento Municipal Utility District  
 South Carolina Electric and Gas Company  
 Southeastern Illinois Electric Cooperative, Inc.  
 Southern Services, Inc.  
 Southwestern Electric Power Company  
 Southwestern Public Service Company  
 Tillamook Peoples Utility District  
 The Toledo Edison Company  
 Tri-County Electric Membership Corporation  
 Vernon Electric Corporation  
 Virginia Electric and Power Company  
 The Washington Water Power Company  
 Wisconsin Electric Power Company

## ENGINEERING AND CONSULTING

A. C. Ackenheil and Associates, Inc.  
 Alvord Burdick and Howson  
 Austin, Smith and Associates, Inc.  
 The Badger Company  
 B. I. Barber and Associates, Inc.  
 Charles T. Barber and Associates, Inc.  
 Barr, Dunlop and Associates, Inc.  
 Bartholomew Associates, Inc.  
 Barton-Ashman Associates, Inc.  
 Howard K. Bell, Consulting Engineers, Inc.  
 Bendix Field Engineering Corporation  
 Alfred Benesch and Company  
 Benham-Blair and Affiliates, Inc.  
 Betz Environmental Engineers, Inc.  
 Black and Veatch  
 Austin Brockenbrough and Associates  
 Floyd G. Browne and Associates, Ltd.  
 Burgess and Niple, Ltd.  
 Burns and McDonnell Engineering Company  
 Byers, Urban, Kluk and Pittenger  
 Byrd, Tallamy, MacDonald and Lewis  
 Camp, Dresser and McKee, Inc.  
 Capitol Engineering Corporation  
 Homer L. Chastain and Associates  
 CH2M/Hill  
 Clark, Dietz and Associates Engineers, Inc.  
 Clark and Eversen Hamersky, Schlaebitz, Burroughs & Thomsen  
 Columbus Engineering Consultants, Ltd.  
 Commonwealth Associates, Inc.  
 Connell Associates, Inc.  
 Crawford, Murphy and Tilly, Inc.  
 Daily and Associates Engineers, Inc.  
 Dames and Moore  
 E. D'Appolonia Consulting Engineers, Inc.  
 (P) Dresser Industries, Inc. (Dresser Center)  
 EBASCO Services, Inc.  
 Edwards and Kelcey, Inc., Massachusetts  
 Edwards and Kelcey, Inc., New Jersey  
 Engineering Consultants, Inc.  
 Environmental Engineers  
 Eustis Engineering Company  
 Ewing Engineering Company  
 Fairbrother, Gunther and Bowman, Inc.  
 Ferver Engineering Company  
 Finkbeiner, Pettis and Strout, Ltd.  
 Fluor Corporation  
 Fromherz Engineers  
 Foster-Van Gundy and Associates  
 Galson and Galson  
 Gannett Fleming Corddry and Carpenter, Inc.  
 Gates Engineering Company  
 Goodkind and O'Dea, Inc.  
 Greeley and Hansen  
 Charles W. Greenwald Associates, Inc.  
 Haley and Aldrich, Inc.  
 Hardesty and Hanover  
 Havens and Emerson, Ltd.  
 Hayes, Seay, Mattern and Mattern  
 Hazelet and Erdal  
 Holland and Kurtz, Inc.  
 Horner and Shifrin, Inc.

 Howard, Needles, Tammen and Bergendoff, Wisconsin  
 Hudgins-Thompson-Ball and Associates, Inc.  
 Jenks and Adamson Engineers  
 Kaehrle Associates  
 (P) The M. W. Kellogg Company  
 Ketchum, Konkel, Barrett, Kickel, Austin  
 Fenton G. Keyes Associates  
 King and Gavaris  
 Konski Engineers  
 Macchi and Hoffman Engineers  
 Albert C. Martin and Associates  
 McClelland Engineers, Inc.  
 McFarland, Johnson, Gibbons Engineers, Inc.  
 Metcalf and Eddy, Inc.  
 Moffatt, Nichol and Bonney, Inc.  
 Masure-Fok Engineering Company, Ltd.  
 O'Brien and Gere Engineers, Inc.

Oyster, Iusas and Associates, Inc.  
 P and W Engineers, Inc.  
 Parkhill, Smith and Cooper, Inc.  
 (R) The John T. Parsons Company  
 J. N. Pease Associates  
 Pfeifer and Shultz, Inc.  
 Phillips and Stong Engineering Company  
 Malcolm Pirnie, Inc.  
 (P) J. F. Pritchard and Company  
 W. E. Quicksall and Associates, Inc.  
 John G. Reutter Associates  
 Richardson, Gordon and Associates  
 Ruth and Goin, Inc.  
 Sargent and Lundy Engineers  
 (P) Schlumberger Well Services  
 Seelye, Stevenson, Value and Knecht, Inc.  
 Shaffer, Johnston, Lichtenwalter and Associates, Inc.  
 Shannon and Wilson, Inc.  
 Stanley Consultants, Inc.  
 Syska and Hennessy, Inc.  
 (R) Teledyne Materials Research  
 Torntrone, Campbell and Associates  
 Trygve, Hoff and Associates  
 United Engineers and Constructors, Inc., Jackson and Moreland Division  
 Charles R. Velzy Associates, Inc.  
 Vogt, Ivers and Associates, Inc.  
 Wallace, Holland, Kastler, Schmitz and Company  
 Watkins and Associates, Inc.  
 (P) Rex Watson - Halliburton Services  
 The Ken R. White Company  
 Whitman, Requart and Associates  
 Wright and Company, Inc.  
 Clyde E. Williams and Associates, Inc.  
 Wilson and Ham  
 Wilson and Company, Engineers and Architects

## GAS UTILITIES

Columbia Gas System Service Corporation  
 Columbia Gas System, Pittsburgh Group  
 Consolidated Gas Supply Corporation  
 Gasco, Inc.  
 Kentucky West Virginia Gas Company  
 Pacific Gas Transmission Company  
 Panhandle Eastern Pipe Line Company  
 Southern California Gas Company  
 Southern Union Gas  
 Texas Eastern Transmission Corporation  
 Transcontinental Gas Pipe Line Corporation  
 Wisconsin Gas Company

## RESEARCH

Ball Brothers Research Corporation  
 Bancroft Licensing  
 Battelle, Northwest  
 Consumers Union of U.S., Inc.  
 Contemporary Research, Inc.  
 University of Dayton Research Institute  
 EG&G, Inc.  
 Geotel Company, Plasmadyne  
 The Johns Hopkins University Applied Physics Laboratory  
 Research Laboratories for the Engineering Sciences  
 Sandia Laboratories, California  
 Sandia Laboratories, New Mexico  
 Southwest Research Institute  
 Syracuse University Research Corporation  
 Underwriters' Laboratories, Inc.  
 URS Research Company

## TRANSPORTATION

Bessemer and Lake Erie Railroad Company  
 C. M. St. P. & P. R. R. Company  
 (A) Mohawk Airlines, Inc.  
 Norfolk and Western Railway Company  
 Roadway Express, Inc.  
 Southern Railway System  
 (A) United Air Lines, Inc.  
 The Western Pacific Railroad Company

## FEDERAL GOVERNMENT

Air Force Contract Management Division  
 (R) Argonne National Laboratory  
 Bonneville Power Administration  
 Bureau of Prisons  
 (R) Bureau of Reclamation, Engineering and Research Center  
 (R) Desert Test Center  
 Federal Highway Administration  
 Fort Sheridan  
 Goddard Space Flight Center  
 Kelly Air Force Base  
 Long Beach Naval Shipyard  
 (R) Los Alamos Scientific Laboratory  
 Marine Corps Supply Center, Civilian Personnel Office  
 Marine Corps Supply Center, Barstow, California  
 NASA, Wallops Station  
 (R) Naval Avionics Facility  
 Naval Construction Battalion Center  
 Naval Facilities Engineering Command, Western Division  
 (R) Naval Ordnance Laboratory  
 Naval Supply Center, Oakland  
 (R) Naval Undersea Research and Development Center  
 (R) Oak Ridge National Laboratory  
 Picatinny Arsenal  
 Portsmouth Naval Shipyard

Rural Electrification Administration  
 Tennessee Valley Authority  
 U.S. Army Tank-Automotive Command  
 U.S. Army Weapons, Rock Island Arsenal  
 (R) USDA, Agricultural Research Service  
 U.S. Marine Corps, Headquarters

#### STATE GOVERNMENT

Arkansas Highway Department  
 Connecticut Department of Transportation  
 State of Florida Department of Transportation  
 Illinois Division of Highways  
 Kentucky Department of Highways  
 Louisiana Department of Highways  
 Maine State Highway Commission  
 State Highway Administration of Maryland  
 Massachusetts Department of Public Works  
 Missouri State Highway Department  
 Mississippi State Highway Department  
 Nebraska Department of Roads  
 State Highway Department of Nevada  
 New Mexico State Highway Department  
 North Carolina State Highway Commission  
 North Dakota State Highway Department  
 Pennsylvania Department of Transportation  
 South Carolina Highway Department  
 Utah State Department of Highways  
 State of Vermont, Highway Department Personnel  
 Virginia Department of Highways  
 West Virginia Department of Highways  
 Wisconsin Department of Transportation, Division of Highways  
 Wyoming Highway Department

#### LOCAL GOVERNMENT

City of Akron, Bureau of Engineering  
 Atlantic City Sewerage Company  
 City of Birmingham Water Works Board  
 City of Cincinnati Division of Engineering  
 City of Chicago Bureau of Water  
 City of Cleveland, Division of Air Pollution Control  
 Connecticut Water Company

# SALARIES OF ENGINEERING TECHNICIANS - 1971

A survey being conducted by the  
**ENGINEERING MANPOWER COMMISSION**  
of Engineers Joint Council

Please complete and  
return this form to:

**ENGINEERING MANPOWER COMMISSION**  
345 East 47th Street  
New York, N.Y. 10017

. . . as promptly as  
possible but not later  
than July 31, 1971

1. Reporting organization: Name: \_\_\_\_\_

City: \_\_\_\_\_

Address: \_\_\_\_\_ Zip: \_\_\_\_\_ State: \_\_\_\_\_

2. Name and title of person responsible for data: \_\_\_\_\_

3. Product or service of organization (see back for preferred categories): \_\_\_\_\_

4. Total number of employees in organization (approx.): \_\_\_\_\_

5. Number of engineering technicians employed: \_\_\_\_\_

6. Are these technicians employed predominantly in the state given in your address? \_\_\_\_\_

If not, please indicate location (for purposes of determining regional salary differences.) \_\_\_\_\_

7. If any engineering technicians employed by your organization are not included in this report, please give such additional number and reason for omission: \_\_\_\_\_

Number: \_\_\_\_\_ Reason: \_\_\_\_\_

#### SALARY INFORMATION CONFIDENTIAL WHEN FILLED IN

Only the names of participating employers and the total number of technicians covered will be included in the published report. Salary curves will not be published for any industry group numbering fewer than five respondents, and will be weighted, if necessary, to assure that less than half of the data will come from a single employer in any case. All respondents will be sent a complimentary copy of the curves for their own industry group.

## SURVEY CATEGORIES USUALLY REPORTED BY EMC

### **Manufacturing**

**Aerospace**  
**Chemicals, drugs, plastics, etc.**  
**Electrical machinery & equipment**  
**Electronic equipment**  
**Instruments (precision)**  
**Machinery (other than electrical) and mechanical equipment**  
**Metal products, fabricated**  
**Metals, basic**  
**Petroleum**  
**Other manufactured products**

### **Non-Manufacturing**

**Communication services**  
**Construction**  
**Engineering & consulting services**  
**Mining**  
**Research organizations & laboratories**  
**Transportation services**  
**Electric Utilities**  
**Other non-manufacturing**

### **Government**

**Federal**  
**State**  
**Local**

### **Educational Institutions**

**Colleges and universities**  
**Technical institutes & junior colleges**

#### **Example of Completed form:**

Please report the number of individuals in each appropriate block as indicated below:

	<b>ASSOCIATE DEGREE GRADUATES<sup>1</sup></b>												
	1969 (20)	1968 (21)	1967 (22)	1966 (23)	1965 (24)	1964 (25)	1963 (26)	1962 (27)	1961 (28)	1958- 1960 (29-31)	1955- 1957 (32-34)	1952- 1954 (35-37)	1949- 1951 (38-40)
101	\$16,000 & over												
102	\$15,000-15,999												
103	\$14,000-14,999												
104	\$13,000-13,999										1		
105	\$12,500-12,999												
106	\$12,000-12,499						1			9			
107	\$11,500-11,999							2	1	1			
108	\$11,000-11,499				1			3					
109	\$10,500-10,999		4	2	7	8			1				
110	\$10,000-10,499		1	2	3	1	2						
111	\$9,500-9,999	3	12	10						1			
112	\$9,000-9,499	2	8	3	4		1						
113	\$8,500-8,999	5	6	2									
114	\$8,000-8,499												

## SALARIES OF ENGINEERING TECHNICIANS 1971

**IMPORTANT** — please read carefully before filling out form.

This form gives the distribution of employed engineering technicians as a function of salary bracket, years of experience as measured by age or years since graduation, and formal education received. Separate sections of the form are set aside for three different levels of education. Each individual is to be reported only in the section corresponding to the highest educational level achieved, in the column corresponding to his year of graduation. (See example on reverse.) If year of graduation cannot be ascertained, report by age. Be sure to indicate which method you used.

**SALARY** — should include base salary before deductions, and any predictable supplementary payments such as cost of living differential, etc. Do not include unpredictable payments for overtime work, bonuses, etc.

**ENGINEERING TECHNICIANS** — Technicians as defined for this survey perform work which requires the application of scientific and engineering principles and practical technology, and may include some functions customarily performed by engineers or scientists. Their responsibilities do not fit the definition of "professional" of the Fair Labor Standards Act but do require at least two years of full time technical education beyond high school or the equivalent in industrial training and experience. They may or may not work under the direction of engineers or scientists.

ANNUAL SALARY	ASSOCIATE DEGREE GRADUATES' Indicate whether by year of degree — or age — .

323	Less than \$4,000															323

1. Technical institute education usually embraces a two-year post-high school program leading to an associate degree or certificate in some branch of engineering technology. Include graduates of technical programs in community colleges or other institutions.

2. Non-graduate engineering technicians are those who are qualified by training and experience to perform work that would normally require a two-year technical institute education, but do not have a formal degree.

3. Four-year programs leading to a bachelor's degree in engineering technology or industrial technology, but not an engineering degree.

**Annual Salary by Equivalent  
Years Since Graduation  
from Technical Institute\***

**ALL TECHNICIANS**

**LEGEND**

<b>Upper Decile</b>	— — —
<b>Upper Quartile</b>	— — — —
<b>Median</b>	— — — — —
<b>Lower Quartile</b>	— — — —
<b>Lower Decile</b>	— — —

**Number of Technicians  
covered —**

\*Base year (0 years since graduation) is 1971. For Associate degrees and non-graduates this is considered equivalent to age 20. For Bachelor's degree the equivalent age is 22.
